

Sidhant Kumar

(902) 943-6901 | sd247182@dal.ca | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Dalhousie University

Bachelor of Computer Science (CGPA – 4.11/4.3)

Co-op Work Term Availability: 4 months or 8 months

Sept 2023 – Present

Halifax, NS

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, Node.js, HTML, CSS, SQL, PHP

Frameworks & Libraries: React, Express.js, Flask, Tailwind CSS, Bootstrap, NumPy, Pandas, Plotly

Databases: PostgreSQL, MySQL, MongoDB, Oracle

Tools & Platforms: Git, GitHub, VS Code, Cursor, IntelliJ, PyCharm, Android Studio, Jupyter, Postman, Vercel, Zoho Desk

Machine Learning: Linear Regression, Gradient Descent, Feature Engineering, Data Preprocessing, Model Evaluation

EXPERIENCE

Information Technology Intern

Sewa International — New Delhi, India (Hybrid)

Jan 2026 – Apr 2026

- Triaged and resolved internal IT tickets in Zoho Desk — hardware, software, networking, and account-access issues for staff across the organization.
- Authored runbooks and technical documentation that standardized the IT team's ticket-resolution and onboarding workflows.
- Contributed to IT and CS projects through data management, software operations, and system update rollouts working directly with the IT Manager.

Software Developer – AI Trainer (Remote)

DataAnnotation

Nov 2024 – Mar 2025

- Reviewed AI-generated code responses to user prompts in Python, JavaScript, and other languages, judging correctness and logic.
- Provided corrected code or rubric-based written feedback on flawed outputs to refine the model's future behavior.

PROJECTS

PeerSync — Real-Time Collaborative Coding VS Code Extension

TypeScript, Node.js, Yjs CRDT, Socket.io, WebRTC, SimplePeer, Render

Feb 2026 – May 2026

[Marketplace](#) | [GitHub](#)

- Built and shipped a full-stack VS Code extension to the Marketplace with real-time collaborative coding, live cursors, text chat, and P2P audio/video calling.
- Implemented conflict-free multi-user editing via Yjs CRDT broadcasting delta updates over Socket.io, plus WebRTC P2P audio/video using SimplePeer with canvas-based Picture-in-Picture compositing.
- Designed a Node.js signaling server on Render handling room management, document authority, SDP/ICE relay, workspace snapshot sync, and multi-language code execution (Python, Go, Java, C/C++) with live output streaming.

VoiceToSQL — Natural Language & Voice Query AI Web App

React, Vite, FastAPI, Python, Groq API (Llama 3.3 70B), SQLite, Recharts

Oct 2025 – Present

[GitHub](#) | [Live](#)

- Built a full-stack AI web app that converts natural-language and voice queries into SQL using Groq's Llama 3.3 70B LLM, with safe SELECT-only execution against SQLite.
- Implemented browser voice input via the Web Speech API and auto-generated bar/line visualizations with Recharts based on data shape (time-series vs categorical).
- Supported custom .db/.sqlite/.csv uploads, 6-query conversation history for context-aware SQL, and AI-generated plain-English result summaries.

House Price Predictor — ML Web Application

Python, Flask, NumPy, Pandas, Plotly, HTML/CSS, JavaScript

Aug 2025 – Sept 2025

[GitHub](#) | [Live](#)

- Built linear regression model from scratch using gradient descent optimization.
- Achieved 72.8% R^2 accuracy predicting house prices on the Ames Housing dataset.
- Engineered 16+ features through preprocessing, encoding, and normalization.
- Deployed web app with real-time predictions and interactive dashboards.

Groki — AI Voice-Controlled Inventory Manager

React, Node.js, Gemini API, Supabase

Jan 2025 – Aug 2025

[GitHub](#) | [Live](#)

- Built a wake-word-activated inventory system enabling fully hands-free pantry management on the web.
- Integrated Google's Gemini API to recommend recipes from real-time pantry contents.
- Implemented secure authentication and PostgreSQL storage via Supabase; deployed on Vercel.

HONORS & ACTIVITIES

Honors: Dalhousie Global Entrance Scholarship; Sexton Scholar; Coursera ML Specialization [Certificate](#).
